SUMMARY

Innovative Computer Science student with strong skills in web development and problem-solving, proven through hands-on hackathon experience and real-world civic technology projects. Demonstrates effective teamwork, leadership, and a commitment to delivering impactful solutions.

EXPERIENCE

Graphic Designer

AIML CLUB, GIETU

October 2025 - PRESENT, IN

- **Designed** visually compelling and minimalistic posters and social media creatives to enhance brand presence on LinkedIn and Instagram.
- **Applied** modern typography, balanced layouts, and aesthetic color palettes for engaging visual communication.
- **Created** consistent design themes optimized for digital visibility and audience engagement.
- **Utilized** Figma/Canva (or your actual tools) to deliver high-quality creatives aligned with content goals.

Frontend Development Intern

MKVI solutions

May 2025 - June 2025, Pune, IN

- Developed full stack app – Bhaati Pizza delivery app using python flask LINK.

PROJECT

Jal Tatva

Smart Solution for Sustainability (JTS3) • github.com/thenameisadityyaa/Technovation-Hackathon-Sharda-university

- February 2025 - November 2025
- Designed and implemented an IoT-based embedded hardware system for real-time water quality monitoring in rural and industrial areas.
- Integrated pH, TDS, and turbidity sensors to collect continuous environmental data with high accuracy.
- Developed anomaly detection logic to automatically identify contamination patterns and trigger alerts.
- Enabled wireless data transmission and cloud dashboard visualization for remote supervision and decision-making.
- Built automated response mechanisms to activate corrective actions, ensuring safe and sustainable water management.

Samadhan – Civic Issue Reporting Platform

TECHNOVATION HACKATHON SHARDA UNIVERSITY • github.com/thenameisadityyaa/Samadhan

- Contributed to the development of a digital civic issue reporting platform connecting citizens with government authorities.
- **Engineered** a user-friendly complaint submission module integrating image upload and GPS-based location tagging.
- Collaborated with the team to create a centralized dashboard for municipal authorities to manage and resolve issues efficiently.

EDUCATION

Bachelor of Technology in Computer Science

Gandhi Institute of Engineering and Technology • Gunupur, Odisha, India • Oct 2023 - Present • 7.23

Intermediate

Valley View School • Jharkhand, India • June 2021 – May 2023 • 59.7%

- Excellence my communication skills.
- Learned the Python as my first programming language.

Matriculation

Ramakrishna Mission Lady Indra Singh English School • Jharkhand, India • June 2021 – May 2023 • 80.0%

SKILLS

Python, Java, JavaScript

React, Node js, Mongo DB, Vercel, Postman

Github

Windows, Manjaro Linux, Mac

Canva, Figma
